Utility systems

Microtecnica is today a major supplier of mechanical, electromechanical and hydraulic primary and secondary flight control actuation systems together with utility systems for aircraft, helicopters and missiles.

Microtecnica is a leader in the technical development of high performance actuation systems and its products serve on both commercial and military fixed and rotary wing aircraft and missiles.

Microtecnica has established excellent partnerships and worksharing agreements with a number of companies worldwide.

Microtecnica's recognized capability in dealing with advanced mechanics and electronics provides us with the ability to produce integrated systems meeting the most demanding customer requirements.

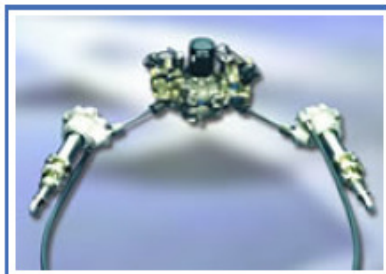

Systems

- Primary flight controls for aircraft
- Secondary flight controls for aircraft
- Blade folding/locking devices for helicopters
- Variable-geometry nozzle actuators for engines
- Fin controls for missiles and torpedoes
- Thrust vector controls for boosters/launchers
- Tilting equipment for high speed trains
- Propeller control drive units

Components

- Actuators
(mechanical, electrical, hydraulic, geared rotary)
- Control drive units
(hydro-mechanical, electro-mechanical)
- Special devices
(no-backs, gearboxes, torque limiters)
- Utility computers
(flap control units, position control units)
