

## Dimensions (φ16 to φ32)

● Position locking type (Q) head side position locking (H), piping port position 180° change (O)

Note 1: Note that the HD and RD dimensions at 10 stroke may differ from these dimensions due to the various settings.

Note 2: Refer to page 1910 for 2-color indicator, HD/RD dimensions and projection dimensions of the switch with preventive maintenance output.

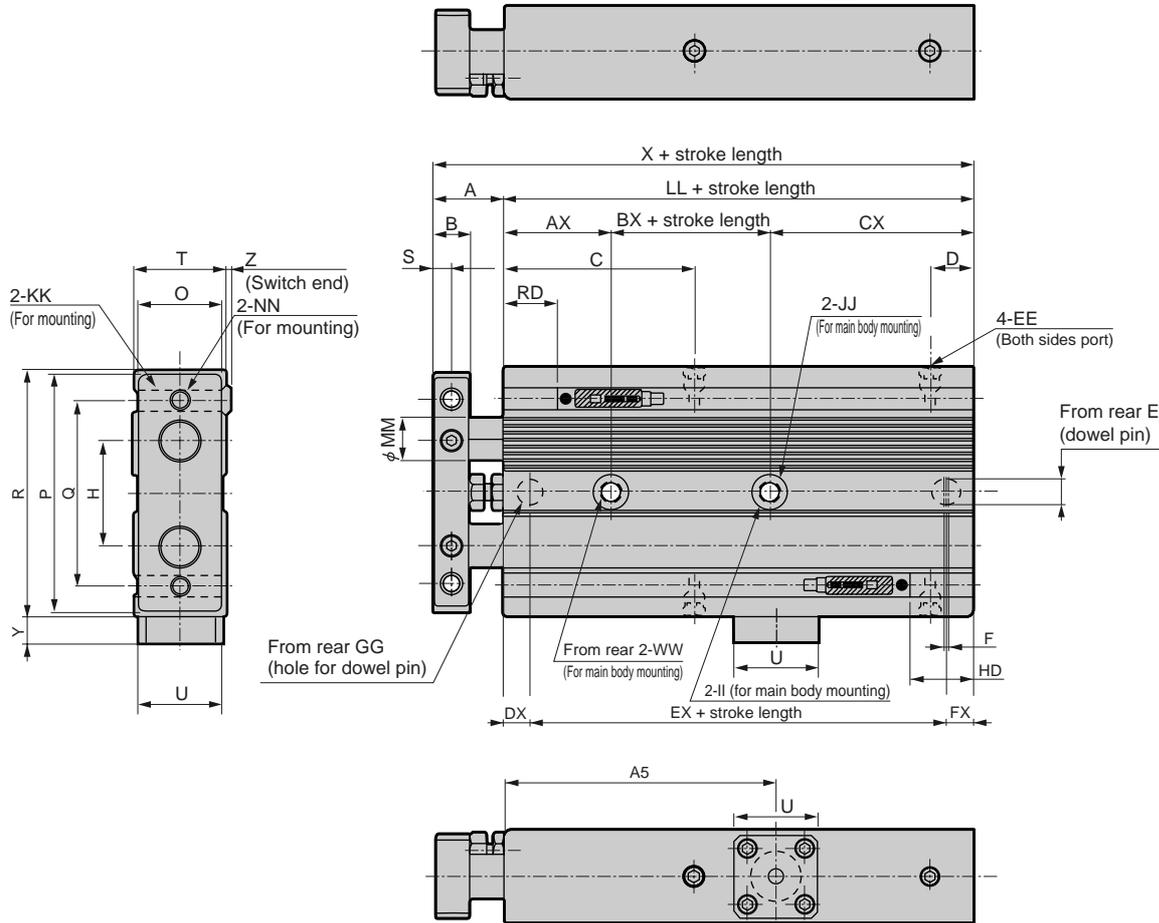

Note 3: When the counter bore surface (JJ) is the mounting surface, this cylinder has a step which could cause the cylinder to tilt. In this case, change the port position or use the option with port position changed 180° (O) so that the counter bore surface is not the mounting surface.

### Dimensions (φ16 to φ32)

- Position locking type (Q) head side position locking (R), piping port position 180° change (O)

Note 1: Note that the HD and RD dimensions at 10 stroke may differ from these dimensions due to the various settings.

Note 2: Refer to page 1910 for 2-color indicator, HD/RD dimensions and projection dimensions of the switch with preventive maintenance output.

Note 3: When the counter bore surface (JJ) is the mounting surface, this cylinder has a step which could cause the cylinder to tilt. In this case, change the port position or use the option with port position changed 180° (O) so that the counter bore surface is not the mounting surface.
