

Functional gauge used in military aircraft (bomb support).

PROBLEM

Structure (Aluminium) in which the bush are to be inserted (tolerance IT3)

Very difficult to measure the dimensions in metrological room.

FEATURES

- Tolerance: ± 0.002 mm between holes total length 600 mm.
- Customized package
- Dimensional test report
- Total production: 11 pieces
- Design: Italian aeronautical company (*that told us that Rosfer was the only company accepting to make a prototype*)

ROSFER SNC - Via Morozzo, 14 - 10141 Turin (Italy)
